

UCAT ENROLLMENT HISTORY

SUMMARY

An input measure of higher education is the number of students who enroll at an institution. This Issue Brief provides information showing enrollment growth at UCAT campuses since FY 2002.

DISCUSSION AND ANALYSIS

The following table provides a historical perspective of the two types of students who enroll at UCAT campuses. In the subsequent graphs, the blue line in each figure measures the number of membership hours generated by high school students. The red line depicts the number of membership hours earned by post-secondary or adult students.

In FY 2002, adult students earned almost 2.9 million membership hours, while high school students earned 2.1 million hours. Through FY 2005, total membership hours have hovered around 5 million. From FY 2006-2009, the number of membership hours earned by high school students stayed fairly constant at about 1.9 million. During that same time, the number of adult hours increased from 3.3 million hours to 4.1 million hours.

In FY 2010, the number of membership hours earned by high school students decreased by approximately 250,000 membership hours, while adult hours increased by approximately 628,000 membership hours. In FY 2011, UCAT saw the number of hours earned by high school students decrease by nearly 150,000 hours (8.92%), while adult hours decreased by 29,075 hours (0.61%). This trend toward more hours earned by adults and fewer hours earned by high school students can be seen in the graphs with the spread between the blue and red lines becoming greater in the last few years.
