Quick simple bullet points to set the record straight. What am I missing? Your response ASAP would be much appreciated. Thanks!

==========

Here is a little supplemental perspective on Chris Vanocur's ridiculous report: (Link) EXCLUSIVE: Oops! Redistricting legislators split homes in half

* Legislatures use U.S. Census blocks for redistricting.

* Census block boundary lines don't always adhere to actual lines on the ground. Sometimes those boundaries run through houses.

* SB 3005 which we passed unanimously hours prior to the congressional map provides a fix.

* SB 3005 gives the Lt. Governor the authority to compare the U.S. Census map lines to state maps based on aerial photography (more accurate) along with other relevant data, and determine which congressional district each home lies. Local officials will conduct elections based on the LG's determination.

* The KTVX report seemed to ignore objective reporting of the facts in favor of partisan ridicule and partisan messaging.

Subject: Draft Redistricting Thank You
Attachments: redistricting thanks.wpd

Last night at about 11:00 PM the Legislature passed the congressional redistricting map - the last of the four maps to be approved. With that, the redistricting process is substantially over (until the litigation starts??). Though there was partisan bickering and will be for some time yet over this very important process, I can say that our office performed amazingly well in the heat of all this.

The legislative Redistricting Committee began shortly after the legislative session ended and worked long and hard until just two weeks ago when it had its last meeting. Our office, however, was very much involved long before the Committee ever got appointed. John Cannon, who was the lead person for our office for redistricting, along with some of our analysts, worked for the last couple of years with the Bureau of the Census and local governments to prepare for the census and coordinate census data. In addition, he and John Fellows and other went to several training sessions hosted by NCSL and again coordinated with the Bureau of Census. The office also had to prepare two RFPs (Tom, John C., John F., Joe, and others were involved here) to get companies to submit bids for the necessary software to do the map drawing, and another RFP to design an online tool for citizens to draw maps, an effort that is virtually unprecedented nationally. The hardware and software had to be purchased and installed (Mark Allred and his staff helped those already mentioned here).

So when the Redistricting Committee first met, literally hundreds of man-hours had been invested already by this office in getting things ready for the Committee. Then came the 20 meetings throughout the state. The logistical planning was truly significant. Large and functional rooms had to be found and reserved. Computer hookups and internet access had to be available, and screens located. Hotel reservations had to be made, meals planned, and vans and even planes had to be reserved and paid for. Then came the meeting mailings with agendas, etc. Here, Kim was superwoman. She was the logistics and reservation planner, problem solver, and minuteman all in one.

Our attorneys, especially John F., Eric, Emily, and Angie, were the go-to guys for an enormous amount of legal advice and counsel.

However, when it is all said and done, the real troopers in this long and politically charged process were our analysts. After all, they did the heavy lifting. They were the ones who lived in our basement for six months drawing maps again and again and again. They drew maps one-on-one; they drew maps with groups of legislators looking over their shoulders; they even drew maps by telephone. They did this for hours on end, Monday through Friday, weekends and holidays, day and night, and even very early in the morning. They drew maps when legislators were happy, mad, pressed for time, and ready to shoot anyone in sight. They drew maps for elephants, donkeys, and yes, even porcupines. Yet through it all they continued to be "their best professional selves." So a special thanks goes to Joe, Leif, and Jerry, who were the heaviest lifters of the heavy lifters. But Allison, Art, Ben, Brian, Mark, Phil, and Rich also played major roles. I simply cannot say enough about the effort these guys and gal put in.

I have never been more proud of working with this office than I have during this most political of all legislative processes than I have these last several months. Please know that I appreciate all of

you and consider myself truly fortunate to be able to work with such professionals. You all made the office shine indeed. Thank you so much.

[...] New Utah Congressional Map approved I think there is a debate on how this process of redistricting works. Probably better to have a independent group do it, but it is what it is and Utah isn't the only place that does it this way (ex. Florida). So anyone know who is running for District 2 (where I live)? I see the map, I have heard of some candidates, but I don't think even the candidates know what district they are in. John, Here it is. Thanks for your help.

Last night at about 11:00 PM the legislature passed the congressional redistricting map - the last of the four maps to be approved. With that the redistricting process is substantially over. Though there was partisan bickering and will be for some time yet over this very important process I can say that our office performed amazingly well in the heat of all this. The legislative redistricting committee began shortly after the legislative session ended and worked long and hard until just two weeks ago when it had its last meeting. Our office, however, was very much involved long before the committee ever got appointed. John Cannon, who was the lead person for our office, was involved with the 29 county clerks as early as ------_to see to it that census data.... In addition, he and John Fellows went to several training sessions over several months hosted by the Bureau of Census ... Then the office had to prepare an RFP (Tom, John C. John F. and others were involved here) to get companies to submit bids for the necessary software to do the map drawing. Then we had to pick the winning bidder. The hardware had to be purchased (Mark Allred helped those already mentioned here).

So when the redistricting committee first met literally hundreds of man-hours had been invested already by this office in getting things ready for the committee. Then came the 20 meetings throughout the state. The logistical planning was truly significant. Large and functional rooms had to be found and reserved. Computer hookups, internet access had to be available, and screens located. Hotels reservations had to be made, meals planned, vans and even planes had to be reserved and paid for. The came the meeting mailings with agendas, etc. Here Kim was superwoman. She was the logistics and reservation planner, problem solver, and minuteman all in one.

Our attorneys, especially John, Eric, Emily, and Angie were the go to guys for an enormous amount of legal advice and counsel.

However, when it is all said and done, the real troopers in this long and politically charged process were our analysts. They after all did the heavy lifting. They were the ones who lived in our basement for six months drawing maps again and again and again. They drew maps one on one, they drew maps with groups of legislators looking over their shoulders, they even drew maps by telephone. They did this for hours on end, Monday through Friday, Saturdays and Holidays, day and night, and even very early in the morning. They drew maps when legislators were happy, mad, pressed for time, and ready to shoot anyone in sight. They drew maps for elephants, donkeys, and yes even porcupines. Yet through it all they continued to be "their best professional self." So a special thanks goes to Joe, Leif and Jerry who were the heaviest of lifters of the heavy lifters. But Allison, Ben, Art, Brian, Mark, and Rich also played major roles. I simply cannot say enough about the effort these guys and gal put in.

I have never been more proud of working with this office than I have during this most political of all legislative procceses than I have these last several months. Please know that I appreciate all of you and consider myself truly fortunate to be able to work with such professionals. You all made the office shine indeed. Thank you so much.
